Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - *who are they?*	Describe the customer and their attributes here
I'm trying to	*List their outcome or "job" the care about - what are they trying to achieve?*	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way – *what bothers them most?*	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists – *what needs to be solved?*	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view – *how does it impact them emotionally?*	Describe the emotions the result from experiencing the problems or barriers

Customer Problem Statements

Customer Problem Statement template (Miro)

I am a Market Strategy Director (Emily Johnson). PS-1
I'm trying to understand which EV categories and brands drive sales.
But the market data is a large raw file with 100,000 records.
Because it has no visual summary of categories, brands and ratings.
Which makes me feel stressed and unsure before planning meetings.

I am an Automotive BI Manager (David Chen). PS-2
I'm trying to give clients clear advice on regions, competitors and batteries.
But I must combine sales, region and battery columns manually.
Because there is no interactive tool that links them.
Which makes me feel slow and less confident.

I am a Sustainable Mobility Researcher (Dr. Sarah Williams). PS-3
I'm trying to measure range and CO_2 benefits of different EV categories.
But environmental data is hidden among many attributes.
Because existing reports do not compare categories visually.
Which makes me feel frustrated and unable to give quick policy advice.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	a Market Strategy Director (Emily Johnson)	understand which EV categories and brands drive sales	the market data is a large raw file with 100,000 records	it has no visual summary of categories, brands and ratings	stressed and unsure before planning meetings
PS-2	an Automotive BI Manager (David Chen)	give clients clear advice on regions, competitors and batteries	I must combine sales, region and battery columns manually	there is no interactive tool that links them	slow and less confident
PS-3	a Sustainable Mobility Researcher (Dr. Sarah Williams)	measure range and CO_2 benefits of different EV categories	environmental data is hidden among many attributes	existing reports do not compare categories visually	frustrated and unable to give quick policy advice
