SMARTBRIDGE
Let's Bridge the Gap

Project Initialization and Planning Phase

Date	31 October 2026
Team ID	NA
Project Title	Electric Vehicle Market Performance & Insights
Maximum Marks	3 Marks

Project Proposal (Proposed Solution) template

This project proposal outlines a solution to address a specific problem. With a clear objective, defined scope, and a concise problem statement, the proposed solution details the approach, key features, and resource requirements, including hardware, software, and personnel.

Project Overview	
Objective	Create an interactive Tableau dashboard that shows how the EV market performs – sales by category and region, leading manufacturers, battery technology, driving range and CO_2 savings.
Scope	100,000 EV records (ev_market_test.csv, 37 attributes, model years 2018–2026); 8 worksheets, 1 dashboard and 1 story on Tableau Public. Forecasting and machine learning are out of scope.
Problem Statement	
Description	Strategy, consulting and research users cannot quickly see which categories, regions, brands and battery types lead the EV market, or which vehicles save the most CO_2, because the data is a large raw file.
Impact	Faster and better decisions on product focus, client advice and EV policy; questions that took hours of manual filtering are answered in seconds.
Proposed Solution	
Approach	Download data → check types, nulls and duplicates in Tableau → create extract → build worksheets → design dashboard and story → publish on Tableau Public → document and test.
Key Features	Sales by category and region, top-10 manufacturers by sales and rating, average range and CO_2 savings by category, battery

	technology mix, sales by model year, region filter, Tableau Story.

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	CPU	Any modern Intel i3/i5 or AMD Ryzen laptop
Memory	RAM	8 GB
Storage	Disk space	≈ 500 MB (dataset 23 MB, extract and workbook)
Software		
Frameworks	BI tool	Tableau Desktop / Tableau Public
Libraries	Additional tools	Tableau extract (.hyper), Tableau Public
Development Environment	Workspace, version control	Tableau Desktop, GitHub
Data		
Data	Source, size, format	Kaggle – Electric Vehicle Market Classification Dataset (ev_market_test.csv); 100,000 rows × 37 columns; CSV
