Project Design Phase-I
Solution Architecture

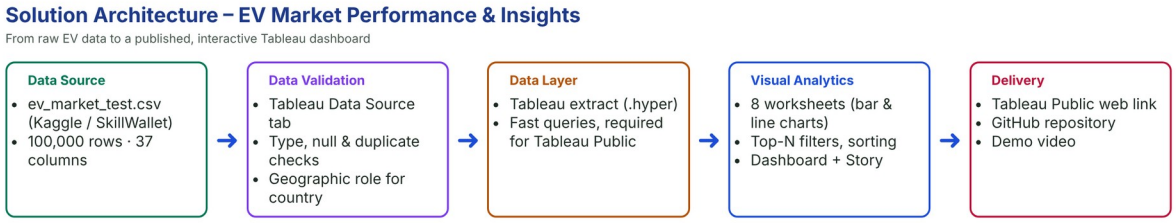

Date	31 October 2026
Team ID	NA
Project Name	Electric Vehicle Market Performance & Insights
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.

Solution Architecture Diagram:

Component Description Table

Component Name	Description / Role in Architecture	Technology Used
Data Source	EV market dataset ev_market_test.csv (100,000 rows, 37 columns)	CSV (Kaggle / SkillWallet)
Data Validation	Checks data types, nulls and duplicates; sets geographic role	Tableau Data Source tab
Data Layer	Stores the data as a fast extract	Tableau extract (.hyper)

Analytics	Aggregations (SUM, AVG, COUNT), Top-10 filters, sorting	Tableau Desktop
Visualisation	8 worksheets, dashboard with 6 charts, Story	Tableau Desktop / Public
Delivery	Public dashboard link, files and documentation, demo video	Tableau Public, GitHub, Google Drive
